DECENTRALIZED BASIC EDUCATION  
Teaching and Learning

## OUR PROGRAMS

### **DALI**

DBE 2's Developing Active Learning with ICT (DALI) program introduces teachers to ways in which technology can supplement and broaden active learning approaches in the classroom using limited ICT resources.

Through DALI, teachers gain an understanding of how project-based, collaborative and learner-centered environments facilitate student learning. Teachers also develop an understanding of the instructional potential of technology such as computers, digital cameras and various software applications.

### **University Accredited Teachers' Training**

DBE2 provides educators and administrators with on the job, university accredited training that is developed in partnership with universities and local education stakeholders.

University accredited training is the cornerstone of DBE 2's professional development system which is designed to strengthen the capacity of educators and administrators to initiate, facilitate and promote school improvement

### **Interactive Audio Instruction (IAI) for kindergarten**

In partnership with the Ministry of National Education, DBE2 developed an interactive audio instruction (IAI) kindergarten pilot program consisting of an audio and print-based materials package and a series of teacher training activities.

Through the 106 40 minute audio programs, kindergarten teachers are encouraged to apply active, fun and hands-on teaching and learning. The program is designed to address the needs of under and untrained kindergarten teachers while simultaneously providing relevant, high-quality content to learners.

### **Cluster Resource Centers**

Centrally located Cluster Resource Centers (CRC) house resource materials for teachers and offer a place where they can gather to discuss training content, classroom innovations, create low-cost learning materials and collaborate with colleagues.

CRCs are also equipped with a variety of information communication technologies (ICT) including laptop computers, digital cameras and camcorders, all of which are available for teachers to check out and use in their classrooms

### **Active Learning for Higher Education**

Recognizing the strategic role that universities can play in the improvement of basic education, DBE2 has developed an Active Learning for Higher Education (ALFHE) training package designed to familiarize university lecturers with active learning-based instructional strategies.

### **University Partnerships**

DBE2 works in close collaboration with 15 Indonesian universities and three US universities.

DBE2 has facilitated the development of a university consortium in order to consolidate experience and best practices amongst university partners and facilitate sustainability of DBE2-university and university-university initiatives.

### **Public-Private Alliances**

DBE2 has established alliances with Intel Teach totaling \$1.5 million to provide ICT training and introduce 21st century skills to teachers and with BP totaling up to \$2 million to improve education management in three districts in Papua province and to strengthen the education faculty at Universitas Cendrawasih.

### **Saman Siaga Gempa Earthquake Preparedness Song and Dance**

In response to the December 2004 tsunami that hit Aceh province, DBE2, Universitas Syiah Kuala and a team of junior secondary and secondary school youth created song lyrics that convey earthquake readiness messages. The song lyrics were combined with traditional Acehese dance movements to create Saman Siaga Gempa or the Earthquake Preparedness Dance. A Saman Siaga Gempa instructional DVD has been created and distributed to primary school art teachers and students throughout five districts in Aceh.

## Our Training Modules

### University Accredited Training Packages

A series of accredited training packages covering nine content areas have been developed by DBE 2 in collaboration with its university partners

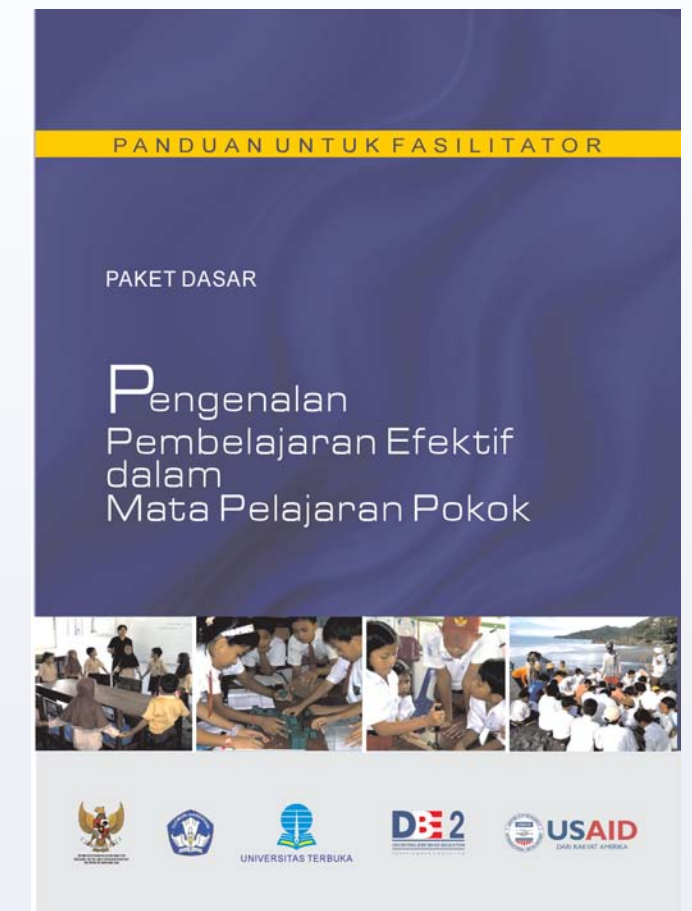

#### Subject Matters Training Packages

- Bahasa Indonesia Training Package
- Mathematics Training Package
- Science Training Package
- Civics Training Package

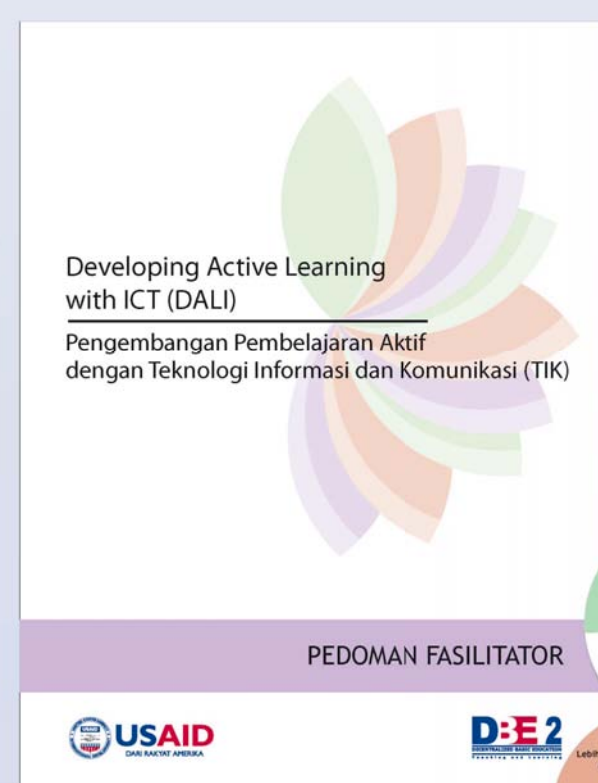

#### School Development Training Packages

- Learning Communities
- Classroom and Personnel Management
- Guidance and Counseling
- Planning and Assessment

#### The Foundation Package: Introduction to Effective Teaching and Learning in Core Subjects

The Foundation Package introduces the concept of active learning and discusses how it can be applied across core subject areas

#### DALI

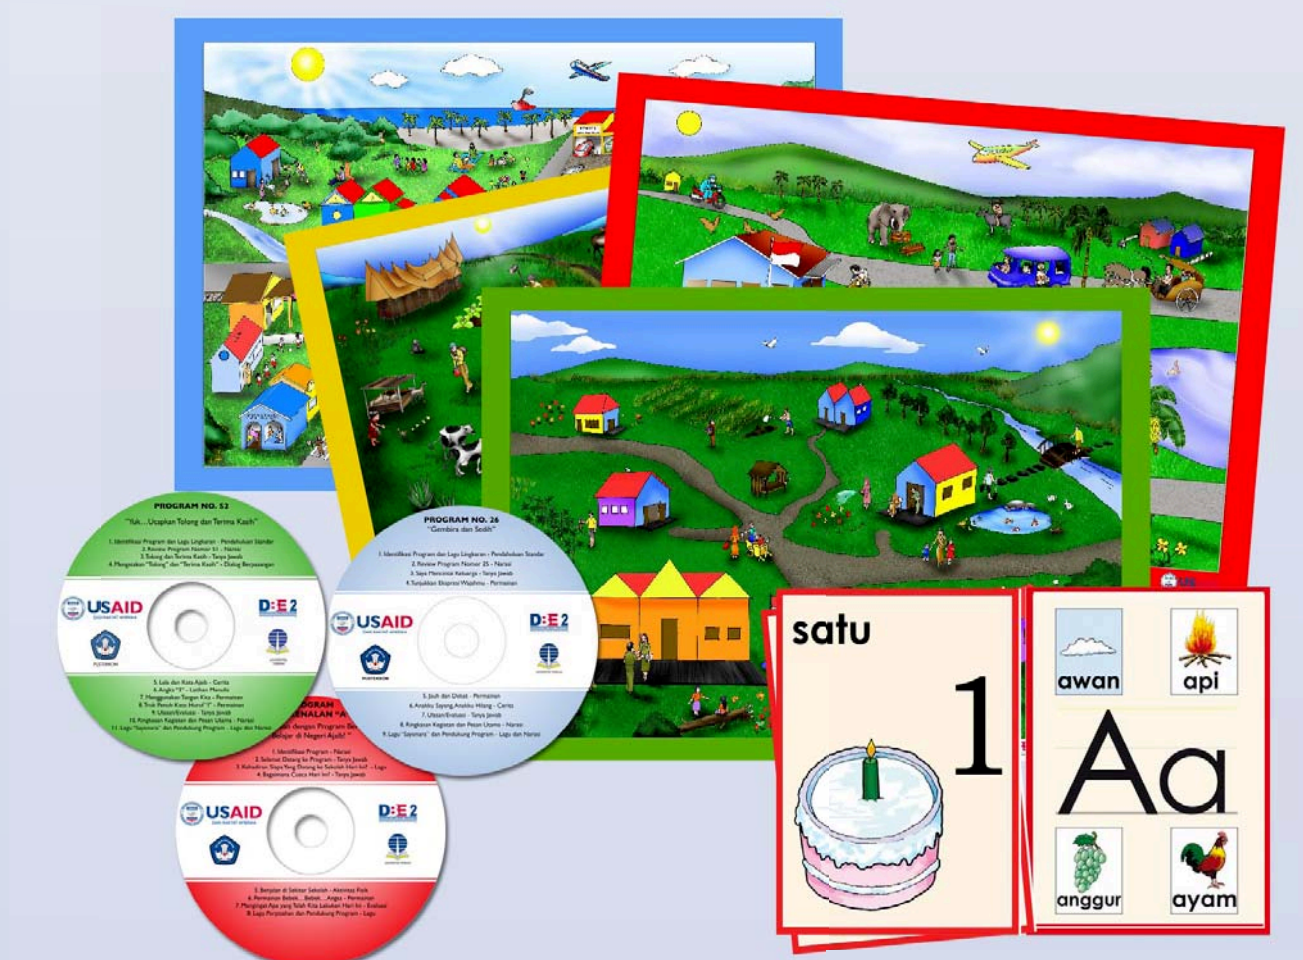

DALI Training Packages  
The Developing Active Learning with ICT (DALI) training package consists of:

- DALI facilitator guide
- DALI
- DALI Instructional DVDs (Module 2,3 and 7)

#### Saman Siaga Gempa Booklet and Interactive DVD

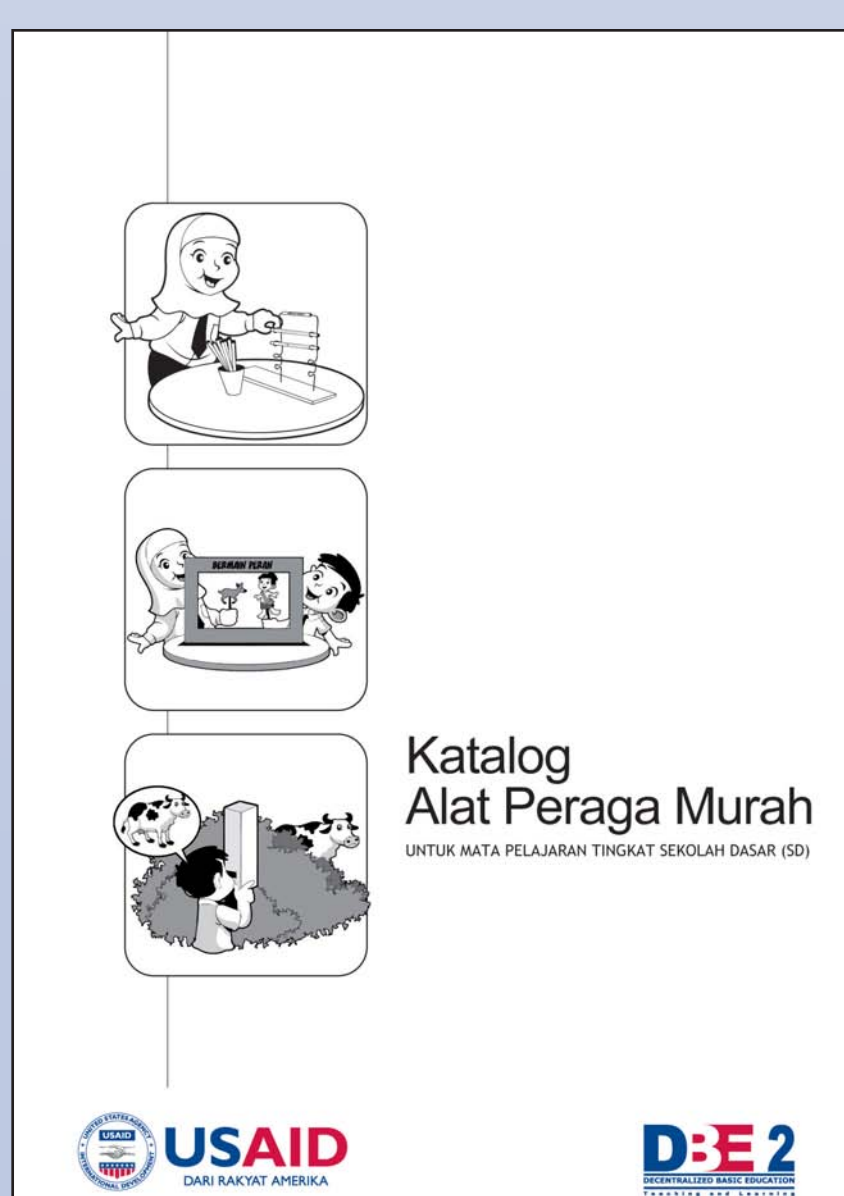

- The Saman Siaga Gempa Package consisted of:
- Saman Brochure, which contains the text of Saman Siaga Gempa lyrics in Acehnese, Bahasa Indonesia and English.
  - Instructional DVD that contains step-by-step instructions for the dance movements and song lyrics

#### Paket Program Audio Interaktif

The Paket Program Audio Interaktif (PAI) includes:

- 106 audio CDs of 35-40 minutes program
- Teacher's guide
- Four posters
- Student worksheets
- Number cards and letter cards
- One CD player
- Scissors and crayons
- Batteries for CD player

#### Low-Cost Materials Catalogues

DBE2 developed low cost materials catalogues for primary and kindergarten teachers.

The catalogues provide a step-by-step guide on how to make the learning materials using easily accessible and low-cost resources.

#### Active Learning for Higher Education

The Active Learning for Higher Education (ALFHE) training package includes a series of four manuals discussing Active Learning in Higher Education
